ALL HELD FOR MURDER

M'ALISTER, KERR, DEATH AND

CAMPBELL INDICTED.

Charged with Criminally Assaulting and Causing the Death of Jennie Bosscheiter.

NEW YORK, Nov. 2.- The grand jury ful, and the result of the canvass assures at Paterson, N. J., to-day returned indictments against Walter C. McAlister, George J. Kerr, William A. Death and Andrew Campbell, who are charged with the murder of Jennie Bosscheiter, who was drugged to death on Oct. 18. There the latter. Judge Barkalow received the indictments and instructed County Clerk Winfield that the indictments both for murder and assault be transmitted and delivered to the Court of Oyer and Terminer, over which Supreme Court Justice Dixon presides. It is not known when Judge Dixon will come to arraign the men. They cannot be arraigned before any other judge. It is improbable he will come to Paterson before the January term.

It is said that while the grand jury was considering the case some of the members were disposed to find an indictment against accessory to the assault, at least, but they were in the minority. The hackman claimed to know nothing about the condition of the girl when she was bundled into licity is justice. Bryan is an honest man. men into doing as he was told.

It is alleged that in the course of the discussion of the case among the members of the grand jury it was said that Jennie's heart was weak and it was suggested that this may have been the cause of her death. There was no evidence that chloral was administered and this point can only be determined by the analysis of the stomach or by a confession from one of the accused The physicians could not say positively that death was due to a poisonous drug, but this matter will be cleared before the case comes to trial. It was said in support of the statement that death may have peen due to a weak heart that on one occasion Jennie, while standing on a street corner talking to two young men, fell in a faint and remained unconscious for half an hour. The vote on the indictment is said te have been unanimous.

The chemical analysis of the dead girl's organs is being made at a laboratory in New York city, of which Prof. Witthaus, who has figured in the Molineux. Rice and other cases, is the head. The analysis has not yet been completed and no report has been made to the county physician. On this report much is said to depend. It is said it may be needful to accept the confession of Campbell or Death or both as witnesses and accept pleas of guilt from them to the crime of rape only. If the at the regular booths. A redistricting of chemical analysis is strong enough the confessions may not be used. Even if the analysis does not establish the administration of the drug, it is said that the State may elect to eliminate that feature of the matter and proceed to trial upon the assumption that the violence of the assault caused heart failure and death and that would entail the death penalty as much as the administration of the drug.
